Quest Rubric No: 2	1		

Objective criteria (0/1, 1=met)	Rating	Max	Comments
Displays clock time on alpha display as HR:MIN	1	1	
Functions as a simple activity timer (start, stop, reset)	1	1	
Provides continuous reporting of steps per 10s interval to	1	1	
Provides continuous reporting of body temperature per 10s	1	1	
Data at laptop plotted as stripcharts	1	1	
Provides alert function with buzzer on alarm	1	1	
NA		0	
Total objective criteria	6	6	

Qualitative criteria	Rating	Max	
Quality of solution	5	5	Looks good. The two graphics would be better presented in the same display on same axes.
Quality of summary readme.md including use of graphics	3	3	Good detail. Flowchart hard to view due to size.
Quality of code reporting	2	3	Put your names in the code. I also recommend that you separate your js code from your esp32 code into different directories in the code folder.
Quality of video presentation	3	3	The videos were good. I personally prefer more illustrations (such as your flowchart) that you can reference for how you designed the solution. It is clear that you are reading from a script. Can you hide that?
Total qualitative criteria	13	14	

Quant Weight (75)	75	75	
Qual Weight (25)	23	25	
Total Score	98	100	
Rank (1-4)	1	1	

Comments

This is very good. The areas for improvement are to continue to document your results with graphics/blocks, commenting in code, and continuing to improve the video. By the last one you should be production quality.
